

KAI-HUNG (BILL) WANG

+ (886)978-682-869 ◇ billwang.tech@gmail.com ◇ <https://github.com/BillSavart>

SUMMARY

Second-year Master student in Graduate Institute of Networking and Multimedia, National Taiwan University. Advised by Prof. Yi-Ping Hung. He has research experiences in Human-Computer Interaction, VR/AR/MR/XR, 3D/4D Gaussian Splatting, Gaussian Avatars, Embedded System on Raspberry Pi and STM32. Fluent in both Mandarin and English (TOEIC: 960).

EDUCATION

Master of Science, National Taiwan University, Taipei, Taiwan September 2025 - Present

- Graduate Institute of Networking and Multimedia
 - Advisor: Prof. Yi-Ping Hung
 - Focus: Human-Computer Interaction, VR/AR/MR/XR Applications Development

Bachelor of Science, National Cheng Kung University, Tainan, Taiwan September 2016 - June 2020

- Department of Computer Science and Information Engineering

RESEARCH EXPERIENCES

Image and Vision Lab, National Taiwan University March 2025 - Present

- Graduate Research Assistant
 - Supervisor: Prof. Yi-Ping Hung
 - Projects:
 - Headset-Based Multi-User Co-located VR Synchronous Full-Body Avatar Animation via Embodied Character Controller.
 - Oriental Beauty, XR Theatre of Taiwan Literature and Music.
 - Smileoyed: Embodied Virtual Pet for Behavioral Affective Synchrony with Multisensory and Biofeedback.
 - Relaxing World, AI-Generated VR Relaxation Environments using 3D Gaussian Splatting and Real-Time Voice Conversion.

Intelligent System and Media Processing Lab, NCKU March 2018 - June 2020

- Undergraduate Student Researcher
 - Supervisor: Prof. Yau-Hwang Kuo
 - Project: Intelligent Firefighting Command System Based on Image Processing and Inertial Navigation.
 - 1st place in Computer Project Design Competition, CSIE, NCKU

SELECTED WORKS

- Jih-Hsuan Peng, Jung Shen, Yun-Ru Hsu, Zhi-Lynn Lay, Kai-Hung Wang, Wei-Zhe Zhuang, Ping-Hsuan Han, Yi-Ping Hung, "Smileoyed: Embodied Virtual Pet for Behavioral Affective Synchrony with Multisensory and Biofeedback", **SIGGRAPH 2026 Immersive Pavilion**.

PROJECTS

- Bank Interview Advisor, GCP-deployed Web Application.
 - Built and deployed a React/Node.js web application on GCP e2-micro with Docker Compose, Caddy reverse proxy, SQLite storage, and Cloudflare edge protection.
 - Automated CI/CD with GitHub Actions and GHCR, separating image builds from runtime deployment on the VM.
